Human-Computer Interaction and Management Information Systems: Applications

Edited by

Dennis Galletta, University of Pittsburgh and

Ping Zhang, Syracuse University

A VOLUME IN ADVANCES IN MANAGEMENT INFORMATION SYSTEMS
SERIES EDITOR: VLADIMIR ZWASS

Human-Computer Interaction and Management Information Systems: Applications (and its companion volume, *HCI and MIS: Foundations*) offers in-depth, state-of-the-art research by a distinguished set of authors who span the MIS and HCI fields. The original chapters provide authoritative commentaries and in-depth descriptions

of research programs that will guide 21st century scholars, graduate students, and industry professionals.

Human-Computer Interaction (or Human Factors) in MIS is concerned with the ways humans interact with information, technologies, and tasks, especially in business, managerial, organizational, and cultural contexts. It is distinctive in many ways when compared with HCI studies in other disciplines such as Computer Science, Psychology, and Ergonomics. The MIS perspective affords special importance to managerial and organizational contexts by focusing on analysis of tasks and outcomes at a level that considers organizational effectiveness.

With the recent advancement of technologies and development of many sophisticated applications, human-centeredness in MIS has become more critical than ever before. *Human-Computer Interaction and Management Information Systems: Applications* focuses on applications and evaluations including special case studies, specific contexts or tasks, HCI research methodological concerns, and the use and adoption process.

The companion volume, *Human-Computer Interaction and Management Information Systems: Foundations*, focuses on the basics of HCI, with emphasis on concepts, issues, theories and models that are related to understanding humans and tasks, and the interactions among humans, tasks, information, and technologies in organizational contexts in general. Side by side, the two volumes provide comprehensive coverage and new directions for the HCI field.

Contents

Series Editor's Introduction, *Vladimir Zwass*

Foreword, *Izak Benbasat*

1. Applications of Human-Computer Interaction in Management Information Systems: An Introduction, *Dennis Galletta and Ping Zhang*

Part I. Electronic Commerce and the Web

- Human-Computer Interaction for Electronic Commerce: A Program of Studies to Improve the Communication between Customers and Online Stores, *Izak Benbasat*
- Understanding the Direct and Interaction Effects of Web Delay and Related Factors: A Research Program, *Dennis Galletta, Raymond M. Henry, Scott McCoy, and Peter Polak*
- Pop-up Animations: Impact and Implications for Website Design and Online Advertising, *Ping Zhang*

Part II. Collaboration Support

- Bridging Distance: Empirical studies of Distributed Teams, *Judith S. Olson and Gary M. Olson*
- Asynchronous Virtual Teams: Can Software Tools and Structuring of Social Processes Enhance Performance? *Starr Roxanne Hiltz, Jerry Fjermestad, Rosalie J. Ocker, and Murray Tuoff*
- Collaboration Technology, Tasks and Contexts: Evolution and Opportunity, *Ilze Zigurs and Bjorn Erik Munkvold*

Part III. Culture and Globalization

- Toward Reliable Metrics for Cultural Aspects of Human-Computer Interaction: Focusing on the Mobile Internet in Three Asian Countries, *Jinwoo Kim, Inseong Lee, Boreum Choi, Se-Joon Hong, Kar Yan Tam, and Kazuaki Naruse*

- Cultural and Globalization Issues Impacting the Organizational Use of Information Technology, *Geoffrey S. Hubona, Duane Truex III, Jijie Wang, and Detmar W. Straub*

Part IV. Learning and Training

- Technology-Based Training: Toward a Learner-Centric Research Agenda, *Sharath Sasidharan and Radhika Santhanam*
- Developing Training Strategies with an HCI Perspective, *Lorne Olfman, Robert P. Bostrom, and Maung K. Sein*
- The Learning Objects Economy: What Remains to be Done? *Conrad Shayo and Lorne Olfman*

Part V. User-Centered IS Development

- Research Issues in Information Requirements Determination for Systems Development and Human-Computer Interaction, *Glenn J. Browne*
- Dimensions of Participatory in Information Systems Design, *John M. Carroll and Mary Beth Rosson*

Part VI. Health Care/Health Informatics

- Technology-Enabled Transformations in U.S. Health Care: Early Findings on Personal Health Records and Individual Use, *Ritu Agarwal and Corey M. Angst*

- Organizational and Individual Acceptance of Assistive Interfaces and Technologies, *Adriane B. Randolph and Geoffrey S. Hubona*

Part VII. Methodological Issues and Reflections

- Conducting Experimental Research In HCI: From Topic Selection To Publication, *Alan R. Dennis, Monica J. Garfield, Heikki Topi, and Joseph S. Valacich*
 - Soft Versus Hard: The Essential Tension, *John M. Carroll*
